MEMORANDUM

DATE: June 4, 1976

EPA Region 5 Records Ctr.

362169

TO: William C. Child - Northern Region

FROM: Paul R. Steadman *P.R.S.*

JUN 07 1976

SUBJECT: KANE COUNTY - L.P.C. 08905501
Montgomery/ Phillips (Thom)

STATE

At the request of the assistant to the Illinois Attorney General, Mary Schlott, and after discussion with Robert Osmundsen of this Agency's Enforcement Section, I made telephone inquiries with four landfills in the Kane/DuPage County areas in order to determine whether D & N Trucking Company had within the past six months brought or hauled any sewage treatment plant sludges or the like from the Aurora Sanitary District or other points of origin to any of these facilities.

My first telephone inquiry was to the Geneva/Midway landfill in Kane County. I talked with a Mrs. Barbara Lawrence, ticket-taker and keeper of the records, and asked her whether to her knowledge D & N Trucking Company had brought any S.T.P. wastes to this site. Her answer was a definite 'no.' Additional information can be obtained at telephone number 312/232-7664.

My next telephone inquiry was to a Mrs. Cooper at the Green Valley Disposal site in DuPage County. I asked her if D & N Trucking Company had previously brought S.T.P. materials to this facility. She said that she was aware of a plan to bring such materials to this landfill, but that none had been brought there to date. Further inquiries may be made at telephone #312/357-1170.

I next called the Bloomingdale Township/Mallard Lake landfill in DuPage County and talked with Mr. Anthony Falco, site superintendent. The same questions were asked regarding the S.T.P. sludges and D & N, and his answer was "never." Additional information can be obtained at telephone 312/894-9000.

My final inquiry via telephone was to the Yorkville/Nelson landfill facility in Kendall County. I talked with Mrs. Peggy Nelson, record-keeper at the site, and asked the same questions as before. She said that D & N trucks had been hauling in wood, wire and other debris in the past six weeks but no septic wastes, sewage treatment plant sludges or the like were ever brought to the site as far as she's aware. Added information can be obtained at Tel. 312/553-7459.

A detailed site closure and cover plan will be examined and prepared by this office for the subject site on either Monday or Tuesday, June 7 or 8, 1976.
